REASONS FOR ALLOWANCE

Terminal Disclaimer

(1)

The terminal disclaimer filed on March 29, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,352,751 has been reviewed and is accepted. The terminal disclaimer has been recorded.

(2)

The following is an examiner's statement of reasons for allowance: Olsen discloses a tape to be cut off into segments, however the tape has a plurality of longitudinally separated and transversely extending adhesive coating bands. The prior art of record fails to teach or suggest providing a roll of sufficiently transparent linerless sheet material having repositionable pressure sensitive adhesive on its first surface on only the first longitudinally extending portion while having first and second side-by-side longitudinally extending portions (i.e. a continuous adhesive coating longitudinally along only a portion of the sheet material instead of longitudinally separated bands which each extend across the entire surface of a sheet material), providing such a roll of sheet material with a repeating indicia pattern on one of its surfaces to define first and second indicators when the sheet is unwound, visibly detecting the first indicator to facilitate cutting tape flag segments from the sheet material and visibly detecting the second indicator when the tape flag segment is adhered to a surface to direct attention to a section of that surface.

(3)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
